SUMMARY

Computer Science professional with experience across production systems, QA, and full-stack development. Combines troubleshooting, testing, documentation, and software foundations to understand issues, reproduce them clearly, and deliver reliable fixes. Open to software, QA, and IT engineering roles focused on ownership, learning, and clear execution.

CORE SKILLS

Software: OOP, MVC, Dependency Injection, ORM, REST concepts, databases, structured problem solving

QA: Manual test cases, bug reporting, JIRA, issue reproduction, defect documentation

Systems: Workflow systems, troubleshooting, employee support, hardware maintenance, software support, documentation

Tech Stack: .NET, C#, Angular, TypeScript, Next.js, React, Tailwind CSS, MySQL, SQL Server basics, Vercel

Familiar: Java, Python, Node.js, Express, Git basics, GitHub

PROFESSIONAL EXPERIENCE

Technical Support Engineer

Arab Islamic Bank

Oct 2023 – Present

Ramallah, Palestine

- Support and maintain the bank's internal Workflow system, helping ensure user access, system stability, and timely issue resolution.
- Troubleshoot hardware, software, and internal system issues for employees in a production banking environment.
- Communicate with non-technical users, document problems, follow up on fixes, and support smooth daily operations.
- Perform hardware diagnostics, maintenance, and component-level repairs to improve device reliability and reduce downtime.

QA Manual Engineer

The National Bank

Apr 2022 – Oct 2022

Ramallah, Palestine

- Prepared manual test cases and supported software quality validation before release.
- Documented and tracked software defects using JIRA, improving visibility for technical teams.
- Built practical experience in QA workflows, issue reproduction, defect reporting, and product quality control.

Full Stack Developer Intern

MicroMedical

Sep 2020 – Dec 2020

Ramallah, Palestine

- Developed a hospital full-stack application using .NET, Angular, and MySQL.
- Applied MVC, Dependency Injection, ORM, and database-driven application structure.
- Gained hands-on exposure to frontend/backend integration, application architecture, and real software delivery.

SELECTED PROJECTS

Personal Portfolio Website

Next.js · Tailwind CSS · Vercel

Designed and deployed a recruiter-focused portfolio presenting experience, skills, projects, and contact information.

EL_BASTONY Brand Website

Next.js · React · Tailwind CSS · Vercel

Built and iterated a public-facing brand website with structured content, reusable components, launch flow, and partnership paths.

MicroMedical Hospital System

.NET · Angular · MySQL

Developed a database-backed hospital application during internship with practical frontend/backend integration.

EDUCATION

B.Sc. Computer Science

Birzeit University

Aug 2017 – Mar 2022

Palestine

LEADERSHIP & CONTRIBUTIONS

Computer Science Club Chairman at Birzeit University; IEEEExtreme 13.0 Ambassador in Palestine; IEEE Activities Coordinator; first winner of the Faculty of Engineering and Technology IEEE "IQ Test".
